OUR VISION & MISSION

We are contributing towards Vision 2030 with our Robotic Duct cleaning technology to ensure the effective removal of air pollutants and help in improving the air quality. An integral part of our business program is developing the scope and depth of our product range to increase its overall comprehensiveness meeting high standard expectations in current and future developing markets including caring for the aspects of the Green Environment Movement. Today, we are on the journey carrying forward the vision to create new dimensions for our group and strive to become a major driver in our line of business

WHY BREEZE AIR CO.?

01

Provide competitive & premium quality solutions, products and services to our clients

02

Trained, knowledgeable & committed staff with strong synergy

03

Seek growth through innovative solutions & products and market expansion

04

Continuously improve entire business processes

05

Ensure prompt and efficient pre & post-sales services

WHAT DO WE PROVIDE?

AIR COOLED CHILLERS INSTALLATION

Breeze Aircon provides a comprehensive range of air cooled chiller installation services to meet the cooling requirements of various buildings and facilities.

The company offers a site survey service that involves an assessment of the building's cooling needs, including the size of the building, number of occupants, and types of equipment and machinery present that may generate heat. Based on the survey, Breeze Aircon's experienced technicians can recommend the best chiller unit that will meet the building's specific cooling requirements.

WAREHOUSE SOLUTIONS?

We focus on providing warehouse solutions in just one place. For all your HVAC solutions, Breeze can be your one-stop-solution. With proper security of stored products, we ensure to not compromise on the quality of the stored products. In warehouse solutions, we provide:

Floor epoxy -

Epoxy flooring is a surface flooring system that is applied at least two millimeters in-depth. It is applied to your floor in multiple layers. It helps in reducing the heat produced inside.

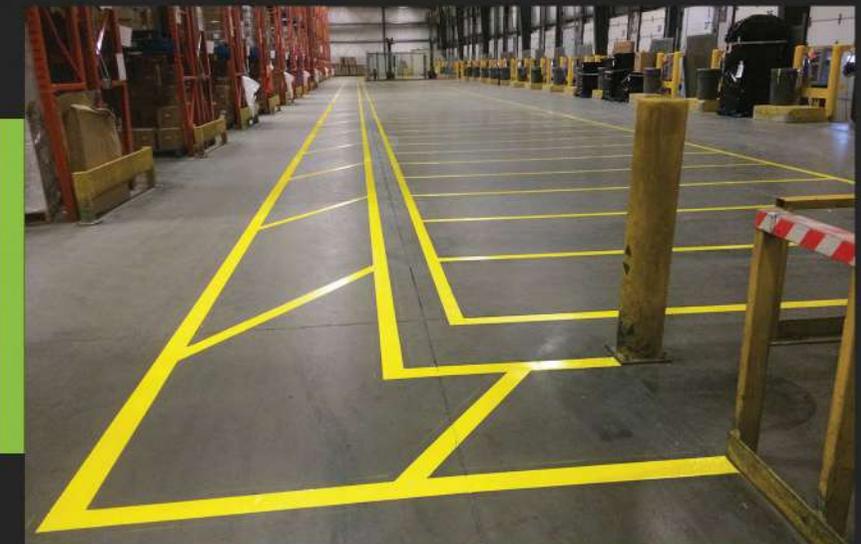

Storage rack -

To make storage more effective and efficient, storage racks can reduce the space area taken and help to store more even in smaller spaces.

Safety marking -

Warehouse safety floor markings are extremely useful in dividing spaces and offering visual cues for the proper flow of traffic, as well as indicate areas where caution should be a priority. From dots to stripes, lines to shapes, professional safety marking is done by Breeze Aircon

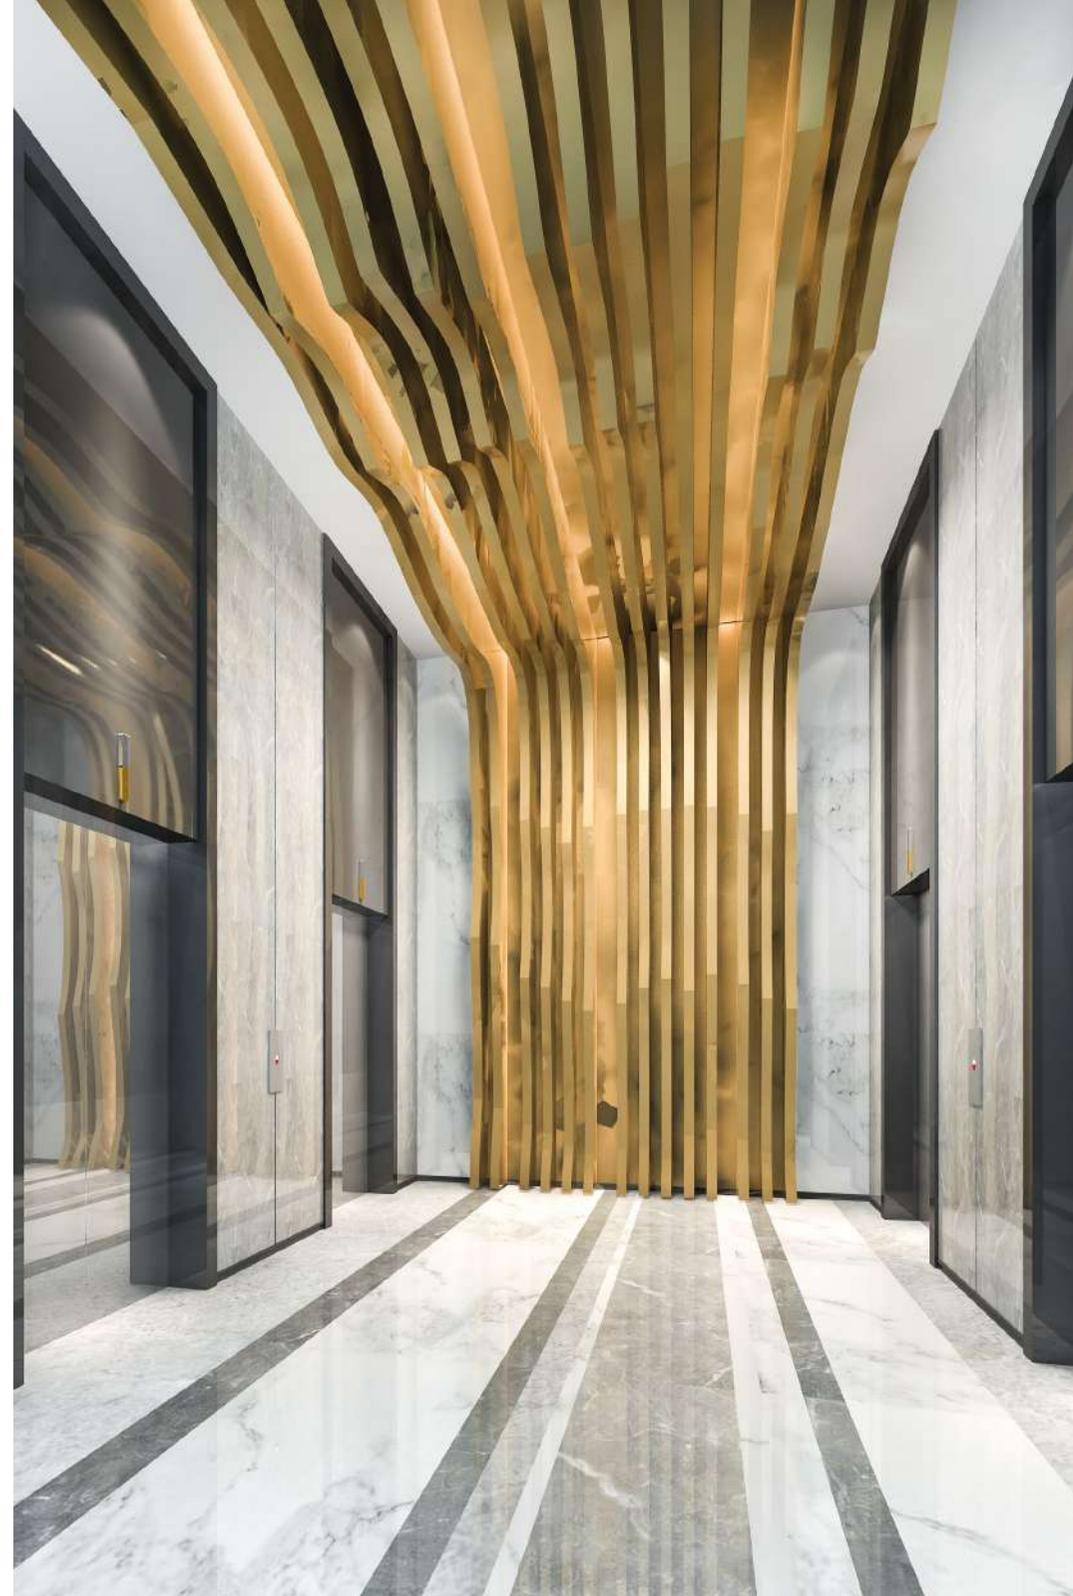

CRAFTING EXCELLENCE IN INTERIOR FITOUT

Transform your commercial, hospitality, or retail space with our expert interior fit-out services at Breeze. MEP works of warehouse - MEP (mechanical, electrical, and plumbing) is the installation of services that give building inhabitants a comfortable environment. Breeze airco, being an experts in this category, provide efficient solutions to the MEP category

DESIGN SUPPLY & INSTALLATION OF HVAC SYSTEMS

Breeze Air Conditioning undertakes complete turnkey projects comprising of design, supply, installation, testing and commissioning of HVAC-R Systems from all leading brands like York, Carrier, Trane, Petra, etc... As every building is unique, each HVAC system installation requires its own unique design considerations to be effective. This is where our creativity, Innovation and ingenuity, combined with technical expertise, makes us the best HVAC partner to have on your construction and remodelling project. Great HVAC systems, when expertly installed, can deliver optimal comfort and energy efficiency for decades. With our vast experience in the industry, we provide efficient Installation & Commissioning Services for most of the HVAC Systems (Chillers, Air Handling Units, Fan Coil Units, Package Systems, etc) from all leading brands. From requirement gathering to sizing, designing, sourcing, delivery, installation, start-up, training and technical support, our qualified team will manage the end-to-end project cycle in strict adherence to quality norms.

GI & PRE-INSULATED DUCTING SOLUTION

We can design, supply and install fabricated Galvanized ducts & Pre-Insulated ducts as per customer requirements. All the accessories such as fittings, attachments, components, and other goods are manufactured from finest grade of material and cutting edge technology as per SMACNA standards. We ensure that all supplied materials carry well defined quality parameters to ensure non combustion, mould resistant and leak proof finish in the end products. The range of ducting is also facilitated with sound proofing and high degree insulation

HVAC MAINTENANCE CONTRACTS & SERVICES

Our Service & Maintenance Division has a highly skilled team of engineers and technicians who are trained and experienced on different equipment from most of the leading HVAC brands and they strictly adhere to HSE requirements. Our focus is to help our clients prevent business disruptions caused by HVAC equipment breakdown and to prolong the service life of your asset

SPECIAL FEATURES

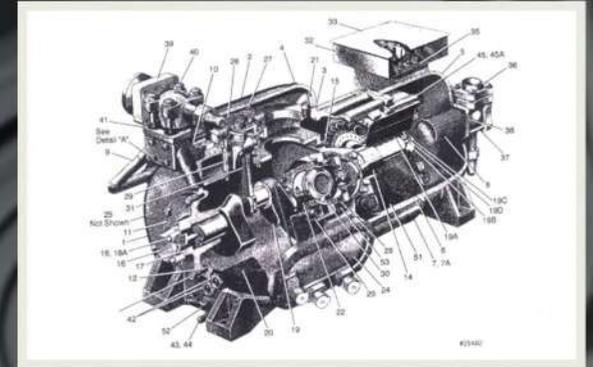

- ▶ Service & Maintenance of HVAC Systems.
- ▶ Preventive Maintenance Contracts.
- ▶ Annual Comprehensive Maintenance Contracts
- ▶ Air Balancing
- ▶ Air Duct Cleaning
- ▶ Chilled Water Systems Maintenance
- ▶ Heresite Protective Coatings

RECIPE & SCREW COMPRESSOR OVERHAULING

One of the very unique competencies of Breeze is that we can offer comprehensive overhauling and rebuilding services for Screw Compressors. Our highly skilled and experienced team can resolve any type of breakdown and rebuild the compressors as well as the new All leading screw compressor models of York, Trane, Recomp, etc can be rebuilt by our experts and If compared to new equipment's cost and lead-time for replacement, It is usually accomplished in an impressive time frame and at very attractive cost.

The cost of rebuilding is protected by Breeze's standard warranty and all together, the return of your Initial and rebuild investment is extended for many more years ahead

HVAC RETROFITTING

Breeze Aircon operates a Repair & Modification Division which will carry out repair & modification of complete HVAC systems from small units to Industrial chillers from all leading brands (Carrier USA, York, Bitzer Germany, Daikin Japan, bock Germany, Mitsubishi Japan, Copeland, Grasso, etc.). Our highly trained team is capable of undertaking sophisticated retrofitting jobs.

HVAC CONDENSER COIL SERVICES

A Coil replacement isn't an overly intensive job, but it requires In-depth knowledge of air conditioning systems. Replacement begins by removing the refrigerant from the air conditioner, followed by cutting the coil from its housing, then brazing and setting the new coil into the air conditioner's line set

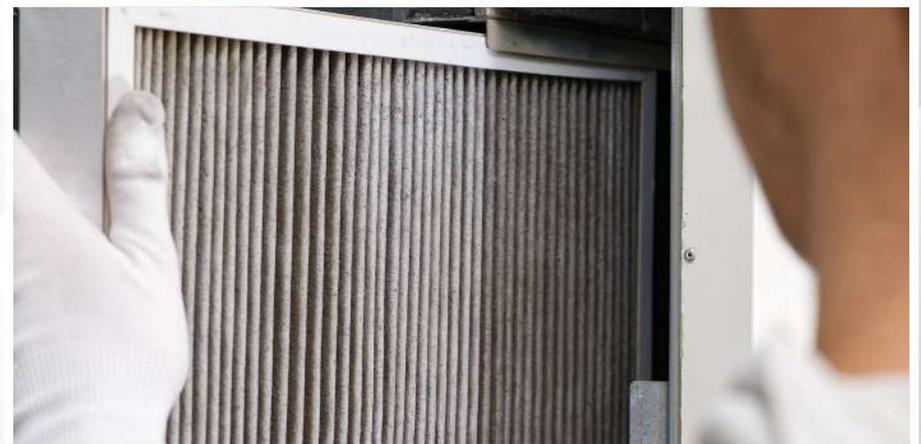

HVAC FILTERS

If you're looking for an air filter for any environment, Whether industrial, commercial, hospitality, healthcare or the home, we have an air filter solution for you.

SOLUTIONS

- ▶ Gulf cube filters
- ▶ Automatic roll filters
- ▶ Bag air filters
- ▶ Gulf-Flo Filters
- ▶ Gulfpac Filters
- ▶ V-Cell filters
- ▶ Hepa Filters

HVLS INSTALLATION

HVLS Fans can save energy costs and increase productivity while respecting the environment!

High Volume Low Speed (HVLS) Fans, is a type of mechanical fan greater than 7 ft (2.1m) in diameter. HVLS Fans move slowly and distribute a large amounts of air allow rotational speed. Conventional ceiling fans our on totally opposite principle of Low Volume High Speed

HVAC, ELECTRICAL SPARE PARTS & CONSUMABLES

We deal with a wide range of spares and consumables for all types of HVAC systems and are capable of offering competitive pricing through our long term partnership directly with OEM suppliers.

We provide you the right high quality parts to install, maintain, repair, retrofit and renovate any HVAC system and maximize their operation during the lifetime of your assets.

GENERAL TRADING

Breeze Air Conditioning has excellent market knowledge and sourcing capabilities for various general trading items, be consumables, tools, machineries, etc that are part of an organization's regular requirement.

ROBOTIC DUCT CLEANING

Robotic duct cleaning is a method of cleaning the ventilation ducts of a building using a robotic machine. The machine is equipped with cameras, sensors, and brushes that allow it to navigate through the ducts and remove dirt and debris.

We at Breeze Air co is providing robotic duct cleaning to provide better efficiency and flawless service.

With the help of the technology, Robotic duct cleaning machines are able to navigate through the ducts quickly and efficiently, allowing for a faster cleaning process.

Key advantages of Robotic Duct Cleaning over manual Process

- ▶ Efficient and Faster cleaning process
- ▶ The brushes and suction systems on robotic duct cleaning machines are able to remove dirt and debris that might be difficult for a human to reach.
- ▶ The sensors and cameras on a robotic duct cleaning machine allow the operator to see inside the ducts and guide the machine to specific areas that need cleaning.
- ▶ Robotic duct cleaning machines are able to clean the ducts consistently and to a high standard, ensuring that the entire system is thoroughly cleaned.
- ▶ Because the cleaning process is faster and requires fewer workers, there is less disruption to the building and its occupants.

M.A. Abudawood & Partners

Industry Co.- Clorox Factory

“ We got in touch with Breeze for our HVAC maintenance & repair for York and Carrier. Not only did they work effectively to ensure maximum satisfaction from us but also did a very clean job. They explained well about the issue and also the technicians gave clear advice on how to take care of our ACs.

Team Noon E-Commerce

“ The entire experience with Breeze was exceptional. From costs to operation, everything was explained for easy understanding. We contacted breeze for our warehouse upgradation and HVAC implementation. Companies like this are hard to come by. I would recommend them to everyone
